Sheraz Hussain

Software Engineer

+923052094845 | hsheraz271@gmail.com | Sargodha , Pakistan | LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

BS Software Engineering graduate (GPA 3.76/4.00) and Full Stack MERN Developer with hands-on experience building production-grade applications using React, Next.js, Node.js, Express.js, and MongoDB. Built and deployed complete systems including a multi-vendor e-commerce marketplace, a Learning Management System with 38+ REST APIs, and an AI-powered campus surveillance platform (CampusGuard) featuring a Hybrid Deep Learning model for suspicious activity detection. Comfortable across the full stack, from designing REST APIs and databases to authentication, real-time features with Socket.io, and cloud deployment with AWS and Docker. Solved 300+ problems on LeetCode and placed 2nd at CodeFusion Hackathon. Looking for a Full Stack MERN Developer role to build scalable, real-world applications from day one.

EDUCATION

University of Sargodha, **Sargohda, Pakistan** - *BS, Software Engineering* - *(GPA: 3.76/4.00)* **Jan 2022 — Jun 2026**

Major Modules: Object Oriented Programming | Data Structures and Algorithms | Database Systems | Computer Networks | Information Security | Cyber Security | Artificial Intelligence | Data Mining | Web & Android Development

Punjab Group of Colleges, **Sahiwal Sargodha, Pakistan** - *Pre Engineering* - *(GPA: 87%)* **2019 — 2021**

Major Subjects: Mathematics, Physics, Chemistry

PROJECTS

LearnEx | Full-Stack Learning Management System, Link **Aug 2026 — Aug 2026**

- Built a production-grade e-learning platform with 2 separate apps (client and admin) plus a dedicated backend server, powering 38+ REST API endpoints for course browsing, secure payments, and content delivery.
- Implemented Redis caching, JWT-based authentication, and centralized error handling across 38+ API routes to improve performance, security, and reliability.
- Developed an admin dashboard with live analytics (Chart.js), Socket.io real-time notifications, and no-code content management for courses, FAQs, and categories

CampusGuard | Smart Campus Safety & Monitoring System, Link **Sep 2025 — Jun 2026**

- A hybrid deep learning model is developed to classify seven distinct types of suspicious campus activities including fighting, vandalism, and snatching.
- Engineered the complete AI detection pipeline integrated into a full-stack MERN web application serving 3 user roles (Admin, Guard, Campus Student Authority).
- Designed a formal incident management workflow auto-triggering guard dispatch, inquiry creation, investigation, and case closure reducing manual intervention by an estimated 60%.
- Integrated AWS S3 for secure media storage and built real-time analytics dashboards tracking activity trends, severity distribution, and incident response metrics.
- Delivered real-time alerts via UI notifications, OS push notifications, and email, ensuring zero missed critical incidents during testing.

Vendora | Multi-Vendor E-Commerce Marketplace, Link **Feb 2026 — Apr 2026**

- Built a single React frontend supporting 3 user roles (customer, seller, admin) with role based dashboards, powered by a Node.js backend exposing 10+ API modules
- Developed a dedicated Socket.io server for real time chat, enabling instant messaging between buyers and sellers across the platform
- Integrated Stripe and PayPal for secure checkout and designed a MongoDB schema with 9 collections to support products, orders, coupons, and seller payouts

InterviewPrep, Link **Oct 2025 — Present**

- Built a production-ready AI-powered mock interview platform using the MERN stack, integrating Google Gemini AI for dynamic question generation and performance feedback.
- Developed secure authentication with JWT, bcrypt, OTP email verification via Nodemailer, and cookie-based session management.
- Designed analytics dashboards enabling users to track interview history and performance trends over time.

SKILLS

Programming Languages	:	JavaScript, TypeScript, Python, C++
Frontend	:	React JS, Next JS, React Redux, Material UI, Tailwind CSS, Bootstrap, HTML + HTML5, CSS
Backend	:	Node js, Express.js, FastAPI, RESTful API, ES6+, Socket.IO, JWT, OAuth 2.0
Cloud & DevOps	:	AWS, Cloudinary, Git, GitHub, GitHub Actions, Postman, CI/CD, Docker, Vercel
Database	:	Mysql, PostgreSQL, MongoDB, Redis
