

Sheraz Hussain

Software Engineer - MERN

+923052094845 hshera271@gmail.com LinkedIn GitHub LeetCode Sargodha, Pakistan

PROFESSIONAL SUMMARY

BS Software Engineering graduate (GPA 3.76/4.00) and Full Stack **MERN Developer** with hands-on experience building production-grade web applications. Developed complete systems for customer-facing platforms, including **AI-integrated security solutions** and **real-time e-commerce marketplaces**. Contributed to a research project on a Hybrid Deep Learning model for suspicious activity detection and collaborated on cross-functional initiatives, solving over **300 problems on LeetCode** and achieving **2nd place at CodeFusion Hackathon**. Actively seeking a Full Stack MERN Developer role to create impactful, scalable web applications.

EDUCATIONS

University of Sargodha | Sargodha, Pakistan

Jan 2022 - Jun 2026

BS, Software Engineering

CGPA : 3.76/4.00

- Major Modules: Object Oriented Programming | Data Structures and Algorithms | Database Systems | Computer Networks | Information Security | Cyber Security | Artificial Intelligence | Data Mining | Web & Android Development

Punjab Group of Colleges | Sahiwal Sargodha, Pakistan

2019 - 2021

Pre Engineering

CGPA : 87%

- Major Subjects: Mathematics, Physics, Chemistry

PROJECTS

InterviewPrep | GitHub

Oct 2025 - Present

- Built a production-ready **MERN** mock interview platform with AI-generated questions and automated performance feedback across **3+ core workflows**.
- Implemented secure authentication using **4 security mechanisms**: JWT, bcrypt, OTP email verification, and HTTP-only cookie-based sessions.
- Developed analytics dashboards to track interview history, performance trends, and progress across **3+ key performance metrics**.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS

CampusGuard Smart Campus Safety & Monitoring System | GitHub

Sep 2025 - Jun 2026

- Developed a hybrid deep learning model to classify **7 suspicious campus activities**, including fighting, vandalism, and snatching.
- Built an end-to-end **AI detection pipeline** with role-based workflows for **3 roles: Admin, Guard, and Campus Student Authority**.
- Automated incident dispatch, inquiry, investigation, and closure workflows, reducing **manual intervention by an estimated 60%**.
- Integrated **AWS S3** for secure media storage and built analytics dashboards for activity trends, severity, and incident response.
- Implemented real-time **UI, OS, and email alerts**, achieving **zero missed critical incidents during testing**.

Technologies / Tools Used : MERN, AWS S3, AI detection pipeline

Vendora | Multi-Vendor E-Commerce Platform | GitHub Vercel

Feb 2026 - Apr 2026

- Built **Vendora**, a full-stack MERN marketplace with **3 role-based dashboards** for users, sellers, and admins, supporting products, coupons, carts, and order tracking.
- Implemented **real-time messaging and notifications** using Socket.io and automated **CI/CD pipelines** for streamlined application delivery and deployment.
- Integrated **2 payment gateways, Stripe and PayPal**, with role-based access control and email verification for secure online checkout.

Technologies / Tools Used : MERN, Socket.IO, Stripe, PayPal

SKILLS

Programming Languages :

JavaScript, TypeScript, Python, C++

Frameworks & Libraries :

React, Next.js, React Redux, Material UI, Tailwind CSS, Bootstrap, Express, Node.js, FastAPI

Tools & Platforms :

Git, GitHub, GitHub Actions, Postman, CI/CD, Docker

Databases :

MySQL, PostgreSQL, MongoDB, Redis

AWARDS & ACHIEVEMENTS

- Bronze Brick Award CALICO Spring'26, **UC Berkely**
- Bronze Brick Award CALICO Fall '25, **UC Berkely**
- 2nd Position in CodeFusion Hackathon, **WPBrigade, Oct 2025**
- Meta Hacker, **Meta**
- Meta Front-End Developer, **Meta**
- Version Control, **Meta**
